

Iteration #01 - Team Formation and Topic Description

Qingyuan Hu

Team or Individual Work:

- Who are the members of your team? (If applicable) No more than 2 Students in each team. What roles and responsibilities have you assigned to each member?

Qingyuan Hu, Yunmu Shu

Detailed roles and responsibilities are not determined yet, but we will collaborate closely to ensure integration of all components and review each other's work regularly.

Topic Selection:

- What topic have you chosen for your final project?

Creating a data visualization dashboard for monitoring key metrics and performance indicators in a manufacturing plant.

- Why is this topic of interest to you and how is it relevant to your field of study?

We are interested in transforming raw data into meaningful insights, and data visualization is a powerful way to achieve that.

This topic is relevant to our field of study as it involves data analysis, dashboard design, and real-time monitoring, many skills in data science and analytics.

Building a dashboard helps us practice working with structured data, metrics, and user-focused design.
